

School-based English Curriculum

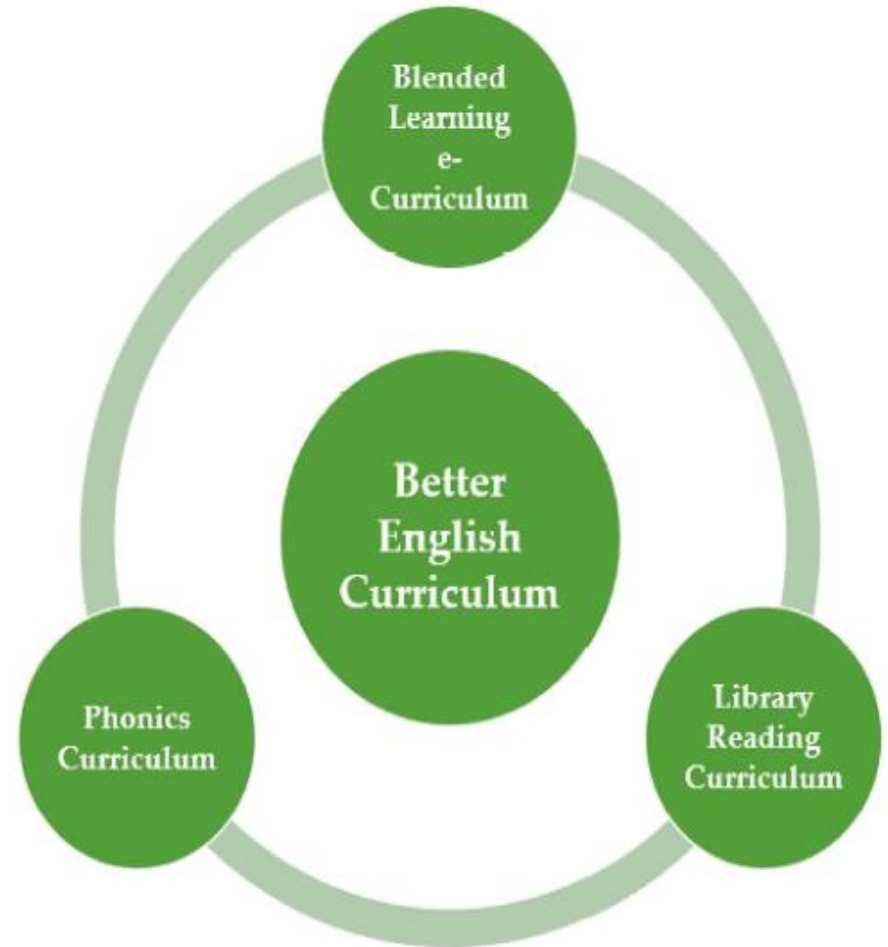

Scaffolding students' learning skills

Shak Chung Shan Memorial Catholic Primary School

Our Beliefs

- Students take an important role in the lessons if they develop habits of learning and self-learning skills
- To achieve this goal, we developed a school-based Better English Curriculum for our Key Stage One students

School-based English e-Curriculum

Background Information:

- In 2014, we joined EDB WiFi 100 scheme to enhance our WiFi infrastructure.
- A school-based e-learning curriculum, “Better English Curriculum” for Key Stage 1 students was developed with tailor-made learning and teaching materials.

School-based Phonics Curriculum

- To provide our students with the building blocks and foundational skills to learn and speak English
- We designed a school-based Phonics App, “Magic Chunking Bee” as part of our phonics curriculum to help students consolidate the foundational phonics skills in KS1.

Library Reading Curriculum

- To build up our students' reading habits and give them the skills to be independent readers, we designed a school-based Library Reading Curriculum.
- To achieve our beliefs: from “Learning to Read” to “Reading to Learn”.

Aims of school-based English Curriculum

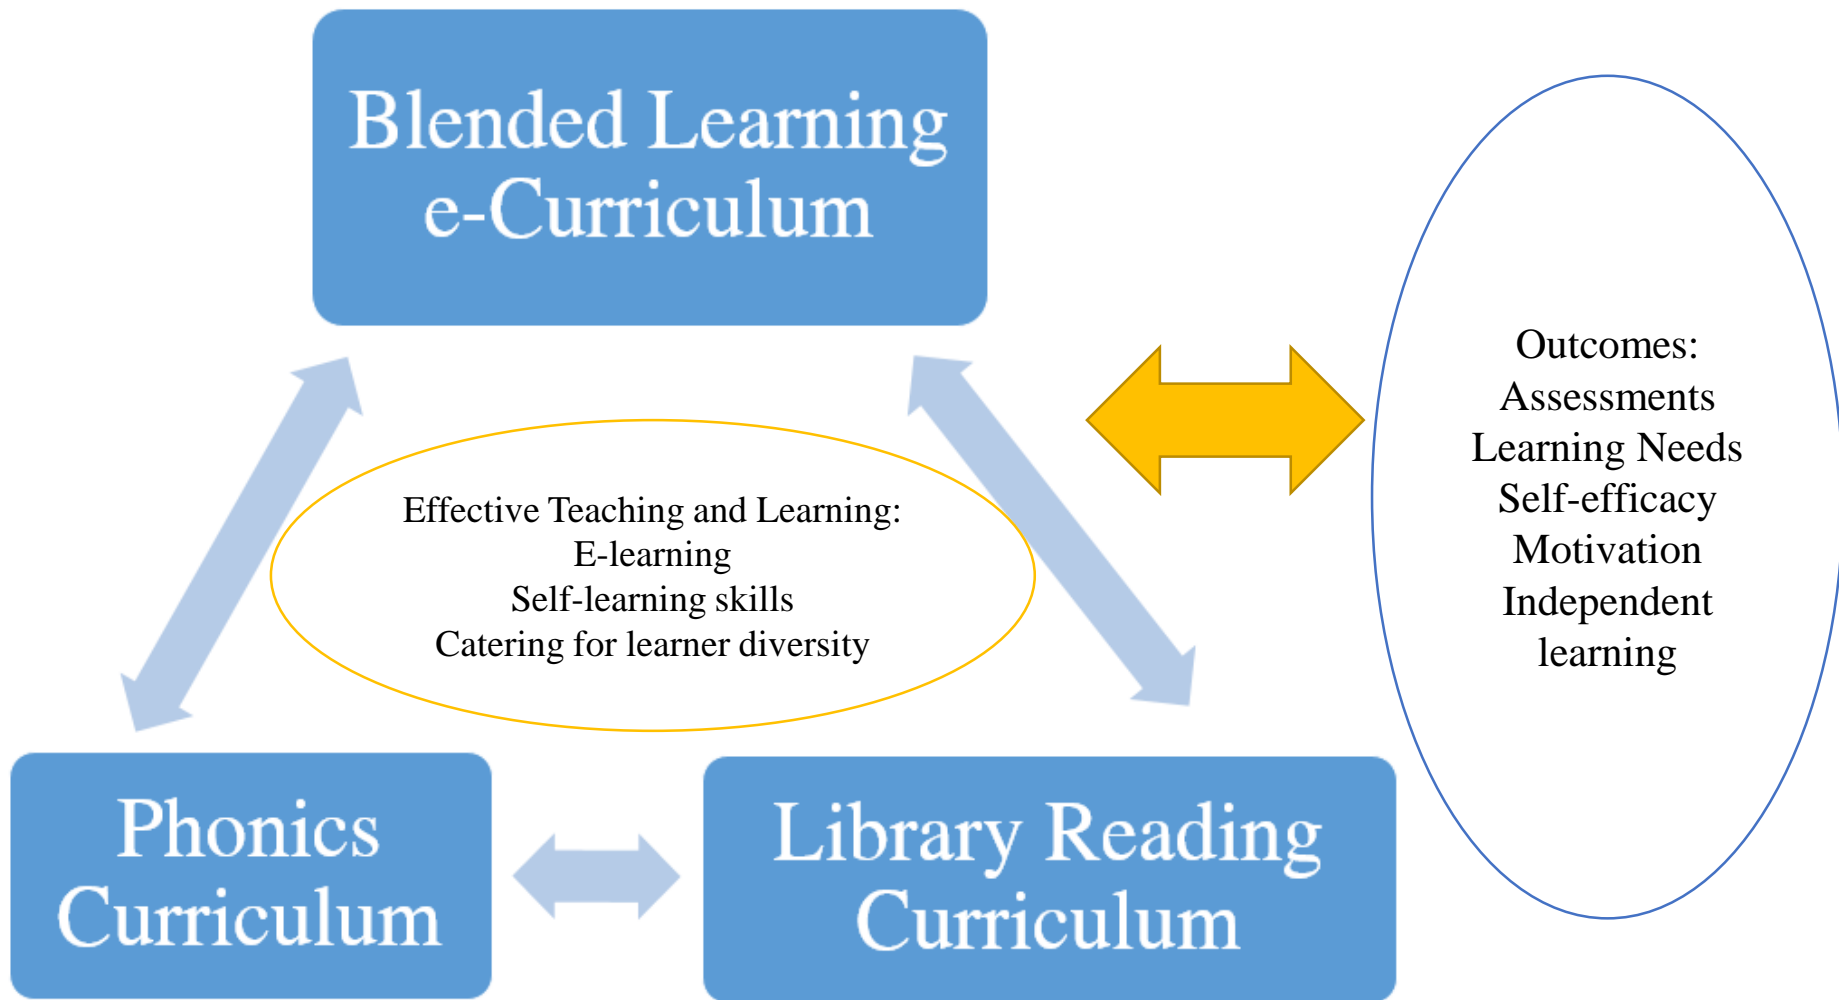

- Self-learning skills

Self-learning tools and skills that are scaffolded systematically to nurture students' independent learning

- Catering for learner diversity

Various learning and teaching strategies are being used to meet the different learning needs of our students

School-based English Curriculum

Conclusion

- For our students, we nurture them with the foundational skills, thinking skills and self-learning tools, and encourage them to extend their learning so that they can become independent lifelong learners.

Thank you!
